

JACK RUSSELL TERRIER CLUB OF CANADA

Kennel Club Registration Policy

The AKC Standard for the kennel club (KC)-version of the Jack Russell Terrier is different than that of the JRTCC's working Jack Russell Terrier standard. As of April 2003, the AKC changed the name of the KC-version of the terrier to PARSON RUSSELL TERRIER, officially making it a separate and distinct breed. Accordingly, the JRTCC will not register any Parson Russell Terrier born after April 2003 or its offspring effective April 1, 2003.

To be registered with the JRTCC, there may be no Parson Russell Terriers within the first four generations of any pedigree. This also includes Parson Russell Terriers from any kennel club in any country. Any terrier registered in the JRTCC/JRTCA previously, and their offspring, remain registerable.
